

## NOTICE TO CONTRIBUTORS

As a result of a recent revision of the taxonomy of mosquitoes in the genus *Aedes* by Reinert (2000, New classification of the composite genus *Aedes* [Diptera: Culicidae: Aedini], elevation of subgenus *Ochlerotatus* to generic rank, reclassification of the other subgenera, and notes of certain subgenera and species. J Am Mosq Control Assoc 16:175-188), it will be necessary to change the generic assignment of a number of species from *Aedes* to *Ochlerotatus*. Species affected include a number of common and well-known species such as *Ochlerotatus caspius* (formerly *Aedes caspius*). Of North American species formerly in *Aedes*, only *Ae. aegypti*, *Ae. albopictus*, *Ae. cinereus*, *Ae. hemiteles*, and *Ae. vexans* will remain in the genus *Aedes*. As a matter of editorial policy, we have accepted this change in generic assignment for articles to be published in the *Journal of the American Mosquito Control Association*. As an aid to authors preparing manuscripts, we have prepared a list of the subgenera that are now included in each of the 2 genera. We have also prepared a list of common species that are affected.

### 1. Subgeneric assignments within *Aedes* and *Ochlerotatus*:

#### *Aedes*:

*Aedes*  
*Aedimorphus*  
*Alanstonea*  
*Albuginosus*  
*Belkinius*  
*Bothaella*  
*Cancraedes*  
*Christophersiomyia*  
*Diceromyia*  
*Edwardsaedes*  
*Fredwardsius*  
*Huaedes*  
*Indusius*  
*Isoaedes*  
*Leptosomatomyia*  
*Lorrainea*  
*Neomelaniconion*  
*Paraedes*  
*Pseudarmigeres*  
*Scutomomyia*  
*Skusea*  
*Stegomyia*

#### *Ochlerotatus*:

#### Section I

*Chaetocruimyia*  
*Finlaya*  
*Geoskusea*  
*Halaedes*  
*Kenknightia*  
*Levua*  
*Macleaya*  
*Molpemyia*

*Mucidus*  
*Nothoskusea*  
*Ochlerotatus*  
*Protomacleaya*  
*Pseudoskusea*  
*Rhinoskusea*  
*Rusticoidus*  
*Zavortinkius*

#### Section II

*Abraedes*  
*Aztecaedes*  
*Gymnometopa*  
*Howardina*  
*Kompia*

### 2. Common species now in *Aedes* and *Ochlerotatus*:

#### Genus *Aedes*

*Aedes aegypti*  
*Ae. africanus*  
*Ae. albopictus*  
*Ae. cinereus*  
*Ae. pempaensis*  
*Ae. polynesiensis*  
*Ae. scutellaris*  
*Ae. simpsoni*  
*Ae. taylori*  
*Ae. vexans*

#### Genus *Ochlerotatus*:

*Ochlerotatus atlanticus*  
*Oc. atropalpus*  
*Oc. bicristatus*  
*Oc. canadensis*

*Oc. caspius*  
*Oc. cataphylla*  
*Oc. communis*  
*Oc. detritus*  
*Oc. dorsalis*  
*Oc. epactius*  
*Oc. excrucians*  
*Oc. fitchii*  
*Oc. hendersoni*  
*Oc. hexodontus*  
*Oc. increpitus*  
*Oc. infirmatus*  
*Oc. japonicus*  
*Oc. melanimon*  
*Oc. nigromaculis*  
*Oc. niphadopsis*  
*Oc. provocans*  
*Oc. pullatus*  
*Oc. punctor*  
*Oc. rusticus*  
*Oc. scapularis*  
*Oc. schizopinax*  
*Oc. serratus*  
*Oc. sierrensis*  
*Oc. sollicitans*  
*Oc. squamiger*  
*Oc. sticticus*  
*Oc. stimulans*  
*Oc. taeniorhynchus*  
*Oc. tormentor*  
*Oc. trivittatus*  
*Oc. varipalpus*  
*Oc. ventrovittis*  
*Oc. vigilax*
