PROGRAM HIGHLIGHTS

for

1972 AMCA Annual Meetings, Miami Beach

April 24-26, 1971

At this writing, notices of intent to present a paper at the Miami Beach meetings are slowly trickling in. It is hoped that this will increase soon to a steady flow and that by the January 15 deadline, a large collection of titles will be on hand.

The current deadline, which is more than a month later than last year's, precludes a complete listing of invited papers for these Highlights because several titles have not yet been received. Full details will be published in the regular program which will be mailed in March 1972.

In addition to the Presidential Address by Dr. Andrew J. Rogers, an address will be given by Mr. Frank L. Wilson, President, Florida Anti-Mosquito Association, in commemoration of the fiftieth anniversary of that Association.

Keynote Address

E. F. Knippling, Science Adviser, ARS, USDA, Beltsville, Maryland. *Some Views on the Management of Insect Populations.*

Invitational Papers

K. R. Fitzimmons, General Manager, Agricultural Chemicals Division, Shell Chemical Company, San Ramon, California. *Role of Industry in Advancing New Pest Control Strategies.*

D. A. Spencer, Ecologist, National Agricultural Chemical Association, Washington, D. C. *Pesticides and Wildlife.*

Symposium: The Venezuelan Equine Encephalitis Epidemic of 1971.

W. D. Sudia, Chief, Arbovirus Ecology Laboratory, CDC, HEW, Atlanta, Georgia. *Transmission Aspects*

R. A. Bram, Research Entomologist, Entomology Research Division, ARS, USDA, Gainesville, Florida. *Mosquito Control Aspects*

J. F. Spears, Associate Director, Plant Protection Division, ARS, USDA, Hyattsville, Maryland. *Operational Aspects*

Panel: Water Management Practices for Mosquito Control and Wildlife Management

C. H. Schmidt, *Moderator*, Chief, Insects Affecting Man and Animals Research Branch, Entomology Research Division, ARS, USDA, Beltsville, Maryland.

Informal Discussion Session: Production and Maintenance of Mosquito Colonies

E. J. Gerberg, Presiding Director, Insect Control and Research Inc., Baltimore, Maryland.

Special Event: At 3:30 to 4:45 P.M. on Monday, April 24, 1972, a special ceremony honoring Dr. Carlos J. Finlay and his role in the early work on the transmission of yellow fever will be held.

Film Showing: On Monday evening, there will be a showing of recently-produced films concerned with mosquitoes. Openings for one or two more films still exist.

NOTE: If any member failed to receive a "Paper Presentation" form, copies are available from Kenneth L. Knight, Program Chairman, Department of Entomology, N. C. State University, Raleigh, N.C. 27607.
