A PRIOR RECORD OF CHRYSANTHEMUM LACUSTRE BROTERO: In a recent note in this journal (72:250, 1970) I reported *Chrysanthemum lacustre* Brotero, a Portuguese introduction, as being recently discovered for the first time in Gray's Manual range. However, Camille Rousseau, of Université Laval in Quebec, has informed me of a record made twenty years previously in Canada. In *Enumération des plantes du Canada, Naturaliste canadien*, 93:1046 (1966) Bernard Boivin cites a collection from Ottawa, Ontario, deposited in the DAO Herbarium, with label reading "Abandoned fields, 1 mi. west of RR. bridge over Rideau Canal, 1948, G. A. Mulligan."

I am most appreciative of Prof. Rousseau's pointing out this earlier record and supplying me with the details.
