In a recent paper we described *Ipomoea seaania* as a new arborescent morning glory endemic to southern Sonora (Felger and Austin 2005). On page 1296 we list the location of the holotype as "UA," the informal local Tucson "acronym" for the University of Arizona. The correct herbarium designation is ARIZ; that is where the holotype is deposited. The line should read: "*Felger with Robert S. Devine 85-301* (HOLOTYPE: ARIZ.)"
