9. *TESTUDO ELEGANS* IN WESTERN RAJASTHAN

According to Smith (1931) the Starred Tortoise, *Testudo elegans* Schoepff has a wide range of distribution in Central and Peninsular India, extending west as far as Sind and south to Ceylon. From Rajasthan, however, Smith reported the tortoise from Udaipur, east of the Aravalli ranges. Recently, the tortoise has been observed at Bisalpur, about 5 km. north of Jawai Bandh railway station on the western side of the Aravallis. They inhabit foothill grasslands composed of *Sporobolus helvolus*, *Heteropogon contortus*, *Cymbopogon parkari*, *C. martinii*, *Dichanthium annulatum* and *Aristida* spp. The tortoise are, however, not very common. They were found to be quite active during

Futehally, Zafar, Daniel, J. C., and Bole, P. V. 1971. "Recovery of Ringed Birds." *The journal of the Bombay Natural History Society* 68, 249–273.
