Ruling

- (1) The name *vestigiatus* De Vis, 1884, as published in the binomen *Hoplocephalus vestigiatus*, is hereby placed on the Official List of Specific Names in Zoology.

History of Case 2920

An application for the conservation of the specific name of *Demansia atra* Macleay, 1884 ([29 November]) by the suppression of *Hoplocephalus vestigiatus* De Vis, 1884 (13 September) was received from Prof Hobart M. Smith (*University of Colorado, Boulder, Colorado, U.S.A.*) and Dr Van Wallach (*4 Potter Park, Cambridge, Massachusetts, U.S.A.*) on 13 December 1993. After correspondence the case was published in BZN 54: 31–34 (March 1997). Notice of the case was sent to appropriate journals.

A comment opposing the application from Dr Glenn M. Shea (*University of Sydney, New South Wales, Australia*) was published in BZN 55: 115–118 (June 1998). Shea considered that the specific name of *Hoplocephalus vestigiatus* De Vis, 1884, which has priority over its synonym *Demansia atra* Macleay, 1884, should be used as valid for the Whip Snake of northern Australia and southern New Guinea. Shea's paper, cited as 'in press' in his comment (BZN 55: 116, 117), was published in *The Beagle. Records of the Museums and Art Galleries of the Northern Territory*, 14: 41–61 in October 1998.

The authors of the application accepted the arguments put forward by Dr Shea in his opposing comment and accordingly withdrew their application.

To provide a record of the case the Commission was asked to place on the Official List of Specific Names in Zoology the name *vestigiatus* De Vis, 1884, as published in the binomen *Hoplocephalus vestigiatus*.

Decision of the Commission

On 1 December 1998 the members of the Commission were invited to vote on the proposal to place the specific name of *Hoplocephalus vestigiatus* De Vis, 1884 on the Official List. At the close of the voting period on 1 March 1999 the votes were as follows:
