

ADDITIONS AND CORRECTIONS TO MY
1913 LIST.

BY GREGORY M. MATHEWS.

- p. 49. *ANOUS STOLIDUS ANTELIUS*, subsp. n.

Differs from *A. s. gilberti* in being browner above and below ; the head lighter and the wing longer, viz., 274 mm. : the wing of *gilberti* being 262.

Type from Cooktown, North Queensland. A male collected on the 4th October, 1897.

- p. 106. I designate as type locality of *Hieraaetus pennatus*, Gmelin, Syst. Nat., p. 272, 1788, Southern France.

- p. 137. *PSEPHOTELLUS CHRYSOPTERYGIUS NOVA*, subsp. n.

Differs from *P. c. chrysopterygius* (Gould) in lacking the yellow over the eye and in having a brown band connecting the black of the head with the brown of the back.

Type, Watson River, Gulf of Carpentaria, North Queensland.

- p. 179. *LEWINORNIS RUFIVENTRIS DIDIMUS*, subsp. n.

Differs from *L. r. rufiventris* in being darker above and below:

Type South-west Australia.

- p. 232. *DIAPHORILLAS TEXTILIS PURNELLI* Mathews.

Is a species and should read *Diaphorillas purnelli* (Mathews).

- p. 303. *ALISTERANUS CINCTUS MACLENNANI* subsp. nov.

Differs from *A. c. atropygialis* (Diggles) in its darker coloration above and below, and measurements probably larger. Wing 61 mm. ; typical birds are 58 mm.

Type from Watson River, North Queensland. A male collected by Mr. Maclennan, on the 18th June, 1914.

Mathews, Gregory Macalister. 1918. "Additions and corrections to my 1913 list." *Austral avian record; a scientific journal devoted primarily to the study of the Australian avifauna* 3, 159–160.
