

Dr. Hillebrand thinks I may be somewhat hasty but, then, he has never been in Strasburg. At any rate, I have not had enough of D. Barry and Heedelbury will be just as advantageous in July as now, while on the other hand, Strasburg will be unendurable in mid summer. The term begins next Monday. Since I have been here I have done nothing but read and write German, which is profitable for me in the highest degree.

I have seen considerable of Dr. Hillebrand since I have been here and he has done all he could to make it pleasant and to help me about my German. We always speak German together when Mrs. H. is not present. She don't allow German in the house. His oldest son is studying chemistry with Bunsen. This little rosy-cheeked boy goes botanizing with his and his father tries to teach him

Dr. Hillebrand writes kindly to you & Mrs. Green  
He

Dear Sir;

Your letter I received while in ~~it~~ as I have been in close touch with myself, I answering until I can something definite. I am to have received the Thuret and Müller undoubtedly be of great value to me. The former I have to Antwerp.

The death of ~~such~~ to me quite unexpected. I do not know that he

The death of such an old man must have affected me very much. I remember seeing him in his house with his grandsons and he seemed to me

of a very amiable disposition and strong personal attachments which must have made him beloved by all who had any acquaintance with him. He must have been quite old.

I almost forgot the substance and date of my last letter to you. I think, I wrote just before leaving Strasburg for the vacation at Easter.

During the six weeks vacation I wished to study the language apart from the botany which I had until then had no opportunity to do. I went to Frankfort with the son of the American Consul at whose house I stopped until I found board with a private family. I stayed there three weeks and had no fault to find with the instruction but found myself imposed upon as regards the money. I left in disgust and went by invitation to the Consul's where

I remained a couple of days and then withdrew to the quiet American city, call it Germany, where of the people speak English is certainly one of the prettiest and most beautiful in spring time the trees are in flower. I come here because I can't get out, for myself, where a good place for studying Dr. Hillebrand thinks Webster, the consul is going to return to America and botany at the same time.

Accordingly I find that not Vice. I find that to be compared with America for botany and I leave for the latter city to May and June with

promising reading and writing  
and ~~want~~<sup>and</sup> in the evenings "Kneip"  
if I can stand the beer. There will  
probably be several excursions into  
the Vosges if the weather is  
favorable.

The proposed changes at Columbia  
and Harvard are important but,  
with regard to them I can only say,  
I shall be very glad of a good place  
in either college and as long as you  
are so kind as to keep my interests  
in view I shall not be anxious. With  
regard to the Sheffield School, the account  
I saw was in the Boston Transcript.  
I will tell my brother to give you  
the money for Cooke's Magazine. I  
agreed to take it from Bolles at \$2.00 but  
I suppose he must have not found  
subscribers enough and so turned over his  
subscription to Mr. Millar. Prof. Hyatt  
of Boston is in Stuttgart. I expected  
him in Heidelberg on Sunday but  
he did not come. He is going to

German. I like to hear  
speak, their voices are  
child will be a botanist  
as he picks everything  
"die schönen Blumen"

I have been to see  
who is a pupil of Han  
who don't think it of  
to study the forms of  
plants but much better  
over the vegetation of  
I agreed that, at the  
we going on, in two  
won't be a botanist  
who knows anything  
Flora of the country

I have written to  
studying with him and  
received an answer  
written, but, without  
help, I puzzled it out  
is poor and has not  
at his disposal so
