

at Heidelberg. Mrs. H. cannot endure
H. and won't speak a word of German.
The Doctor wouldn't live in America
for anything because there is such a
total absence of refined and intellectual
scientific society. It is only in Germany
that one finds any thing worthy the
name of intellect and science. Some
personally, he was kind but he is a
German and to him any German teacher
reeling home after a drunken Kneip
is infinitely superior to the best
American. Of all the people in the
world the Germans are the most
conceited and intolerant. They are
quite like the Chinese in their exclusive-
ness and detest all other nations, more
particularly the Americans, however,
as barbarians. Last week was
quite warm. Now it is cold and
the fruit and vines have suffered
very much. Remember me to Mrs.
Gray. Jackson & I have went to
Rome.

Yours respectfully,
W. G. Farlow
