Card Came

Since return  
in '67 I never  
have examined

three diff. v.

Gomphalus - viz

at Bluffton

Sandy Run,

on the Okeetee

all three of w

have collected

fruit, and from

that I had "seen" two  
species of Gomphalus here,  
one with spiny fruit  
& the other smooth or  
ribbed, - but that I had  
not "seen the last for a  
long time". That was  
a little too hasty & inac-  
curate, but evidently I  
had in my mind a single  
busting pod wh I found  
at "Pritchard's Plantin" in  
1860 - '61, and wh I be-  
lieve was smooth or ribbed.  
But that was a long  
time ago, and I now do  
not feel certain about it!

I hope yet to find  
that same plant & to find  
also smooth fruit, for Dr  
E - had a right to ask  
as to the disceptant statements.

only the brown pod. J. H. M.

Mellichamp, Joseph Hinson. 1876. "Mellichamp, Joseph H. Dec. 6, 1876." *Asa Gray correspondence*
