

My dear Professor,

Some time ago, on  
one of your arrival from the Old  
brought home with you a venerable  
I have been getting together some  
a letter, just received from Col. Bl  
Send on immediately. The package  
to-day. I add a few notes on so

Fedia patellaria, Sulliv. - West  
is extinct in the original locality  
anywhere else since?

Baccharis discoidearia, T. & G. - It is q  
the Delaware near this place. Son  
quite tall (4 feet) & robust. I wa  
it in order to compare it in the  
the following -

Bidens frondosa, L., var. anomala  
along the banks of the Delaware  
Phila. This, after a great deal of  
are persuaded is only a variety  
with upturned awns!

Ilex decidua, Walt. - ? When c  
for I. laevigata, but the broader  
veins underneath have made me  
you can decide the question even

Ilex mollis, Gr. I have from several  
Pocono along with I. monticola

Porter, Thomas C. 1870. "Porter, Thomas C. Jan. 4, 1870." *Asa Gray correspondence*
