

Lastor, Pa.,
Dec. 19, 1877

Dear Professor,

I have yr. second postal, & since
my answer to the first, have looked
up my specimens & notes on the
Gerardian. When I received it, 10 yrs.
ago, from the shores of Lake Erie, I
supposed it to be new & intermediate
between purplea & maritima, & hence
named it on my label, G. intermedia.
As you intimate, I was no doubt wrong
in the matter of its ~~var.~~ relationship
to maritima, & you were right in
discarding the name. Afterward
Col. Olney collected for me a large
number of specimens near Providence
& I intended to make it a subject
of special study.

After reexamination, I think it has
character enough to stand as a
distinct species & you will be safe in
giving it a name, whatever you see
fit. Its dwarf proportions, strict habit,

Porter, Thomas C. 1877. "Porter, Thomas C. Dec. 19, 1877." *Asa Gray correspondence*
