

Brookline, Mass., Jan 26 1886.

My dear Doctor,

Thank you for the 'fery' annotation.  
There seem to have been two very bad  
errors: the relating to the Institute of  
France (really not my mistake, but that  
of the Institute itself) & the date  
Tomey's Mass., this probably I had not  
looked at for years. This last is invariable  
about your third trip to Europe. (the first  
after you went to Cambridge?) Show that  
very vague ideas, although I remember some  
finding Egyptian plants in your herb.  
apparently collected by yourself. You should  
by all means write out a brief account  
(with as many personal anecdotes of  
European botanical as possible) of your  
three last European journeys. For you must
