

From
Department of Agriculture,

Washington, D. C., June 18th, 1880.

Prof Asa Gray

My dear Sir

Yours of the 14th inst. has been rec'd.

It seems a great pity that Grev Munn could not have lived long enough to finish his work.

I hoped to have his determinations to the package I sent him, but it is mostly untouched.)

As to the grasses of Wilkes Ex., one package of the grasses of the Sandwich Islands was returned by you more than a year ago, and I suppose most of those of the Cal. & Oregon have been described by Dr Thunberg, in Bot. Wilkes Vol 17. I would be very glad indeed to work up the grasses returned to you if I had the ability and proper facilities. I have been anxious for years to be able to know thoroughly all the N. American grasses, but have greatly needed authentic named specimens, especially from the Mexican border & Pacific Coast. We have now a set of Mexican grasses, collected by Bourgeau, but they are mostly unnamed. We have probably most of those collected by C Wright in N. Mex. but none
