

Denver Oct 5th 1872

My Dear Dr Gray

It seems that we did not come down from the mountains a day too soon, as the day after our arrival, a snow storm set in and clearing away this morning. The mountain range down to the foothills was heavily draped in snow.

I have just put in the mail for you some roots freshly gathered this morning, including (in two parcels)

- + Abronia fragrans
- + Argemone Mexican a
- + Dalea (aurea) ?
- + Senecio tangitobus
- Mentzelia nuda
- + Pentstemon Coruleus
- Moluccanum Coccineum
- + Phragmites Missouricus

one or two others not certainly recognized I have these wrapped in putta pucha sheets, was sorry I could not have had more moss to pad them up. But you will see how they come

All the above as you may judge from
the deep tap roots grow in deep sand
on exposed hill sides. I was much
disappointed not to get a single seed
of Abronia fragrans. in fact hardly a hair
of the plant left when in July it
covered acres of ground? I should think
the well-formed buds would start readily
though the tap roots were necessary cast off
I retain a few to experiment with this
winter. I shall house them in sand in a
cool cellar & bring them out as a pot house
plant in the early spring and see what
they will do. a few roots of Mentzelia nuda
which seems to be a sort of sub perennial
may be induced to throw up flowering shoots.
I have gathered an abundance of fresh
seed of seeds gathered here I note
Iphomoea leptophylla, Cleome integrifolia
Mentzelia nuda, Argemone Mexicana,
Succowia longistylis, Erythrichium glomeratum
Francoeria Hirsutiana, some others I may
pick up on the road.

I have all the seeds collected since
Box No 2. packed away in your basket
passmier which I shall take with me
in the car, and over haul & assort
again from Davenport. This will make
up Box No 11, and finish up the Colorado
Collection comprising 4 Boxes of live plants
2 of seed & 6 sacks of Concreta.
If thought best to collect Aspidium fragrans
this fall one more Box will be added
All letters not received by me will be
only forwarded to Davenport Iowa which
place I expect to reach Monday evening
and shall attend at once to arranging the
Century sets, a "few good ones" I may
enclose at once in the box of seed
I think the last parcels left in good
time as the weather seems to have cooled
down, and they will no doubt not be long
on the road I shall hope to hear from
you on reaching Davenport a soon after

Yours C C Parry
