

Jan 3. 1877

DOWN,
BECKENHAM, KENT.
RAILWAY STATION
ORPINGTON. S.E.R.

My dear Gray,

I have just received your letter of Dec 22nd. It is very good of you to be willing to send me such rare specimens; but I could not in any case think of accepting your offer on the more chance of making out whether the plants are heterostyled. The chance moreover would be very small without better specimens, as with dead plants

P.S. I send the

Rhamnus lanceolata

with some of
the divisions; but

if it is truly
heterostyled it
will be much
more useful to

obtaining standards
of the collections.

P. R. A. 11

no evidence I think is
sufficient except difference in
size of pollen grains. I have lately
given Kew so much trouble
that I have vowed I would give
no more for some time; but here-
= after I will find out whether
they can share me any of the
plants in question.
I am very glad of the notice about
the black pigs: my faith in

Wyman is so great that I have
not been shaken by Wallace,
who founds his speculation on
a very feeble basis.

With hearty thanks
Yours very sincerely

Ch. Darwin

P.S.

Whenever you write again, can
you tell me whether Primula
Mistassii
nica, Linum virginianum
& Boottii are dimorphic?

Darwin, Charles. 1877. "Darwin, Charles Jan. 3, 1877." *Charles Darwin letters to Asa Gray*
