

My dear Sir

I have thanking to acknowledge the receipt  
of your kind letter with the enclosed *Harfordia*  
fragments. Meanwhile I got also the other species  
of *Harfordia* from poisoning. This is a very inter-  
esting genus indeed but as I think too closely  
allied to *Pterostegia* as to found <sup>upon</sup> ~~on~~ ~~it~~ the two  
species a new genus. The reprint of Barry's publi-  
cation from the Davenport Academy which you  
kindly have sent me, was very welcome to me and  
I have to express you for it my sincerest thanks.

The advice sending of *Eragrostis* will be very  
valuable for us. Should you be able, to send  
specimens with ripe seeds, it would be very  
interesting for me, that I could study the  
germinating and developing of this highly  
interesting group.

Should you have some duplicates of the  
lanceolate of the subjoined list, which want  
in the Royal Herbarium, you would oblige  
me very much. If you would kindly lay them  
to the advice sending.

I remain, Dear Sir,

very truly yours  
W. D. A. D. A. D.

Dammer, Udo. 1891. "Dammer, Udo Mar. 17, 1891 [to S. Watson]." *Asa Gray correspondence*
