

L. obscur. has spreading branches and
only one spike - but we will
omit the same feature on *L. decudr.*
too. My opinion is - that there
are not distinct characteristics enough
to separate *obsc.* from *decudr.*

What you do think about it?

Yours truly
C. H. Peacock

Emma, Saline Co.; Mo. May 12^o 91,

My dear Sir: Please collect for
me in good specimens:

Lycopod. annot. v. pungens Sprng.

Botrychium borealis

" lanceolatum

Yours truly

C. H. Donisthorpe

Demetrio, C. H. 1891. "Demetrio, Charles H. Jan. 13, 1891 [to M. L. Fernald] [2nd item]." *Asa Gray correspondence*
