

24. x. 57

My dear Dr. Gray

Your A Card to hand with
query as to colour of flavens
of Hilireus incanus.

One other aspect: both
of Schneider & Leach (and are
incomplete. - but the latter
in text says of the flavens
"Sa (phare)" - also "petala
striata" & "authentic
flavens" —

I wrote you a few days
ago but did not mention,
probably at the time, another of
your E. O. S. genera, turning
up in a new shedding from
Ichang: = Decumaria.

There is also a fine
thing, folius oppositi
dispositi, - which I

can only regard as a
Viburnum. Flowers with
oblique tubular corolla -
the outer part of the tube,
that is, as in the Saccharum,
one series.

Yours truly,
H. C. G. S.

Donner
