

Columbus, O April 19th 84
Prof Sereno Watson Cambridge.

My dear Sir.

I have received to day and read
paged proofs 350-373. Few corrections to
be made but some remarks which are
perhaps of no moment.

p. 351. line 8 from base after pseudo monoclinus, 2 for:

x " " 9 " " narrowly-rhomboidal, erect -/
p. 354. line 8 from base. for tendrils you substitute branch-
lets. I think stolonis is right.

p. 367. line 9 from base Donnamum for Donnamum.

p. 368 line 13 from above. The locality. Adirondacs MT,
chs H. Fish would be added; there is place in the line.

p. 369 line 14 from above orthocladium for Orthocladum

* p. 373 line 6 from base Bryol. Eur. 505 should be 565.

Would it not be advisable to add after this
page the note in Sullivan's Mosses of the U. S.

p. 78 after H. radiale, about that so called new
species of Schimper mentioned in Bryol. Eur.

[Amblystegium p. 11.] as Amblystegium veratum.

The note of Sullivan would be quite right
and says as much as Schimper does on the
character of the species.

And also, would it not be right to quote
Hedberg. *H. graminicolor* (Brid?) Wils & Hook
in Drum. S. mon. N° 133. as synonym
of *H. sullivantii*, which according to Muller
has been found in Penn. by Muhlberg.
The ? after Brid. renders the synonymy un-
certain. But Sullivant has quoted it in
that way in Mon. of U. S. p. 64.
If you find it right, that could be mentioned
in the Additions and Corrections, end of
the volume.

I have written already the description of
Bartramichela (genus) and *B. Wiltoni*,
Phloxista tenella, two species in Rau &
Hervey Catalogue put them on the authority
of Austin. as found the first in New Jersey
But the last, *P. tenella* is not needed
as it is described as ^{variety} of *P. Muhlbergii*;
p. 218. of the Manual.

Then *Leptodon floridanus* Lindb. *Hypnum*
oxylodon Brid. *Hypnum Vaucherii*, Schp.
found sterile in Canada by Macoun, according
to Austin. *H. alpestre*, Swartz also said
to have been found in N. America (Austin)

Hypnum turgescent Schp. Davis Urants.
and *H. planum* Schwaez. Common in
Florida.

I may send these pages now if you like
But as you will send me a copy of the
whole descriptive part for ^{matrices, in correcting} index, I may
in reading it again, find some more addi-
tions or remarks to be made.

If I shall make the index, please direct
me how to proceed for names in Roman
or Italic. Is not that of Sullivant in
Mon. of the U. S. well arranged. I would
follow it?

Very truly yours
L. Lesquerem

Lesquereux, Léo. 1884. "Lesquereux, Léo Apr. 19, 1884 [to S. Watson]." *Leo Lesquereux letters to Asa Gray*
