

such as there in the Cornhill  
magazine but damaging  
both.

I am making a collection  
<sup>all</sup> of the articles I can find on  
the subject. I will be an  
interesting collection

With kind regards

Yours very truly

John Edw Gray

Professor Agassiz Gray

J. E. Gray

Antislavery Museum

15 May 1860

My Dear Sir

accept my thanks for  
your kindness in sending  
me a copy of your Review  
of my dear friend Darwin's  
Work which arrived this  
morning

The Hypothesis seems  
to make little progress  
here among the Scientific  
men though it is popular

among the general readers  
especially the young ladies  
but I have found very few of  
them that have read the  
Work to the end.

As far as has been discovered  
Dr. Wether is the only Naturalist  
who studies species that  
have been adopted. It  
Mr. Mearns & Mr. Mearns. speak  
with favour in a general  
way. but I don't think  
that they have tried to show

that they have discovered  
any foundation for it based  
on.

I find that Mr. Darwin has  
been carrying on a private  
correspondence with more than  
one of the English botanists. I think  
that he regretted for of  
the discovery has been  
printed in the Journal  
It must have tended to have  
established or to have shown  
the falseness of the Hypothesis  
I cannot regard the papers

Gray, John Edward. 1860. "Gray, John E. May 15, 1860." *Asa Gray correspondence*
