

Fucus fastigiatus.

The fruit is not quite
ripe, however, and
there may be a doubt,

E. ahnfeltia gigarti-
noides of American
writers but this
specimen approaches
very near to *Ahnfeltia*
Durvillaei of Chili.

L. Gymnogongrus
linearis, Ag.

I should be glad
to get more of E for
comparison.

Cambridge
Saturday.

Dear Mr. Watson,

I am much
obliged for the
Richardson lichens.
I have looked over
the specimens you
sent. The fungus
on *Harckhammeria*
is a Meliola. The
genus is in rather
a muddled state
Farlow

just now and I
cannot at once tell
the species,

I add a list of
the Washington
algae. Please excuse
haste as I have
to go to Newton
in a few moments.

W. G. F.

Washington Algae,
A. *Adoultalia*

Alentica Ag.

B. This includes two
different species,

Ptiloto hypnoides
Ham. & *Ptiloto*

plumosea var.

filicina Harlow.

C. *Plocamium*

coccineum Lyngb.

var. *Californicum*.

D. I have always
supposed this to be
a small form of

Farlow, W. G. 1842. "Farlow, William G. undated [Sat.] [to S. Watson]." *Asa Gray correspondence*
