

25, WILTON PLACE.

S.W.

Jan 21 1873

My dear Gray

Many thanks for your last  
notes. Vol. 89 of Lincoln Journal  
(Letters & American notes) has been  
sent as you desired by post as it would  
be too long to wait for General Sherman.  
I can very seldom get the printers to  
do more than a sheet a week and  
there are still six or seven sheets to  
print, and with the Index it will  
be full six weeks before the part  
is ready. - Pray send me word by  
what channel the parcel is to be  
sent to you. - You say & think that I  
may send you 12 copies - and I will

put up with them as you desire the  
Icones Plantarum for Torrey beginning  
with the new series (vol xi)

I yesterday posted for you two sheets  
of Gen. Pl. - to p. 304 - prospere corrected  
to p. 600 the part will extend to beyond  
500 and there will be the bottom  
of Addenda. We have received 2 new  
genera. Remya of Killebrack from  
the Sandwich Isles a very distinct  
one which on account of some development  
of the upper teeth in the ligulate floras  
~~resembles~~ refers to Labiateflora. But  
it is certainly not Mutisia even, but  
allied to Grindelia though quite  
distinct. The other is an opposite leaved  
S. African plant near Pentzia. McGowan  
and Bolus are continually sending up

curiosities from S. Africa

I will attend to your directions  
about the address & bill for Torrey's  
parcel

Yours very sincerely  
George Bentham

I am working up Australian Orchers  
of which I think I shall have near 2000

Bentham, George. 1873. "Bentham, George Jan. 21, 1873." *George Bentham letters to Asa Gray*
