

25, WILTON PLACE.
S.W.

July 9/75

My dear Gray

I write a few lines to thank
you for your last letter - I shall
examine your new *Psoralea* (nearly
like an *Eritrichium*) & your notes on
Scrophulariaceae when I come to work
in some other memoranda before
sending my MS to the printer which
will not be for some weeks yet as
they only get through about a sheet a
week & the *Exogone* & *Stelephora*
they have now in hand will fill
five or six sheets - You will therefore
have time for - and I will be much
obliged to you to send me the sectional
characters you offer for the united
genera *Minimus*

27.8
29 W. 100 X 100 100
I refer *Viticella* Mites to
Galax with which it can have nothing
to do - May it not be *Hydrophyllum*
appendiculatum?

I have just done *Generaceae*
including *Cyrtandraeae* and am
now just attacking *Begoniaceae*

I have had a melancholy interview
going down into Herfordshire to
the funeral of my wife's brother
in law Col Pendarmon - our
Herfordshire connections are now
quite broken up

Yours very sincerely

George Deane

Did I tell you that *Perthymeria* Griseb
is *Sclerophylax* Allen? - Poor Allen has
I am afraid made rather a mess of

the *Scythodes* one new genus is made
out of a single accidentally injured
~~corolla~~ *stamen* flower which was
loose in the packet of the specimen
to which it really belonged

Bentham, George. 1875. "Bentham, George July 9, 1875." *George Bentham letters to Asa Gray*
