

Wilmington Nov. 30 1874

My Dear Dr. Gray I have received
through Mr. Redfield the
beautiful Brazilian ferns, scarcely
any one of which I had before.

And likewise a "Fribria" with
the age of rocks. Most interest-
ing specimens - or to me at
least - which confirm my own
in certain respects.

Please accept my best
thanks for all.

We have stopped work on
our Recorder for the winter and
I shall have a little more
time for Botany in which how-
ever I dare say I shall

do us good.

If there are any sets of Linnæus, or Pains' Plants for sale, Mr. Linnæus would like to be consulted in. At a proper time please let me know.

I saw Prof. Cope yesterday on his way home from Wheeler, Co. He told me that Rothrock had made fine collections.

Fendler has bought a house & lot and is settled here for a while at least. He showed me your letter to him and was much delighted with it.

Kind respects to Mrs. Gray whom I hope is well. I have some few spec-

imens laid out to send you but retain them for a while to add others.

Ever your grateful

Wm. M. Hardy

Through a friend's opinion who had been to Brazil, I tried to open correspondence with a view to an exchange of botanical specimens, but had no success. I have now S. Am. specimens and if any opening for an exchange occurs, would much like to know of it.

Wm. M.

Canby, William Marriott. 1874. "Canby, William M. Nov. 30, 1874." *William Marriot Canby letters to Asa Gray*
