

A. S. HITCHCOCK, M. Sc.,
INSTRUCTOR IN CHEMISTRY.

Iowa City, Iowa, May 16th 1889

Dr. Sessens Watson

Dear Sir: Would
you be so kind as to pass
upon the two enclosed
plants. One is probably
Veronica peregrina but is
hairy. I found a part of
it of this form. Is it com-
mon to find it this way?

The other is com. *E. leucostomus*.
I cannot place it anywhere
among those in the manual
but it is a variety of *E. palustris*.

Yours Very Truly
A. S. Hitchcock
