

DEPARTMENT OF MINES

GEOLOGICAL SURVEY

R. W. BROCK, ACTING DIRECTOR.

OTTAWA, Sea's Farm near Victoria

June 21 1908

Dear Prof. Farlow.

Since my last letter I have made two collections of seaweeds and have added a number of species to my list. These I now send. All were growing except a few that were floating. Those found floating have that written on the under side of the card. I have learned how to preserve the large seaweeds and can make good specimens out of them in all cases.

Specimens numbered from 89 - 114 were collected at Beacon Hill, Victoria about 200 yards farther north than where the collection was made on June 2. Specimens numbered from 115 - 123 were collected at Esquimalt half a mile east of where the collection was made May 30. Most of the small green specimens of this lot were collected in crevices of rocks near high tide.

Tomorrow I leave for Nanaimo about 70 miles from here where I hope to make large collections. Please address me at the Ottawa office. My letters will be forwarded. Very truly yours John Macdonald

Macoun, James Melville. 1908. "[Letter from Macoun to Farlow]." *William Gilson Farlow miscellaneous specimen lists : collectors L-M*
