Algae from Azores Cont. IV
Release, 1903
Cambridge, Mass., U.S.A.

190 .

763. 765. These are young
Laurencia ~~the~~ young to name
with certainty but they
look like *L. paniculata*.

776, 777, 778, 779. These are
all the slender form of
Gelidium corneum, v.
capillaceum now put in
Pterocladia capillacea

There are no cystocarps to
show whether the fruit is
unilateral but there can
be no doubt of the species
I think.

787. *Styrocaulon scoparium*.
A water worn specimen.

795. *Polysiphonia*. This ~~is~~ close
~~related~~ to *P. paniculacea* but I
should call *P. flocculosa* Gay. (?)
