

MIDDLESEX SCIENTIFIC FIELD CLUB.

Mrs Myers

Malden, Dec. 18 1879

A letter from you and Mrs Rust greet me tonight. I am sorry to learn of so much illness among you but I am glad to know that your children have recovered from the fever & hope there will not be any after-effects. I have had sickness among my own during the past two weeks but in a mild form, and only Ella having been obliged to remain at home from school. I am sorry that Mrs Barnes is so afflicted. I am going to write to her in a few days. I have been working in my spare time or rather in such time as I can manage to "filcher" from other work, on the *Cheilanthes* and may publish some notes on them by H3. I have recd a good many specimens & expect in the Spring some good specimens of some of our rarer ferns, but have not yet had a new form, *Aspidium oreopteris* has turned up in Alaska but I have not yet recd a specimen. I know nothing of the plant you mention.

Respectfully

Geo. E. Davis

Davenport, Geo. E. 1879. "Davenport, George E. Dec. 18, 1879 [to F.J. Myers]."
