

Copy of notes sent to Mr. Nelson Nov. 11, 1922 CFW

Plants from J. C. Nelson.

4652. I should say *Potamogeton foliosus* Raf. The glands at the bases of the leaves which should be present in *P. pusillus* are lacking and the fruit seems to be that of *P. foliosus*.
4669. *Digitaria sanguinalis* (L.) Scop. Note the bearded nodes and especially the spikelets.
4762. *Luzula glabrata* (Hoppe) Besv. according to our material arranged by Fernald. *L. divaricata* as represented here is strictly Californian.
4177. *Polygonum aviculare* L.
4797. Viscid: should be *Spargula* ^{er} *sativa* all right.
4477. *Spargula* ^{er} *arvensis* L. note the white papillate seeds.
4825. Not *Drymocallis*. I should call it a stunted specimen of *Potentilla norvegica* L.
4404. *Geranium carolinianum* L.
4457. " *dissectum* L.
4368. *Sidalcea oregana* (Nutt.) Gray is the best I can do with this. A similar plant was long ago labelled "*S. oregana*?" by Dr. Gray: no one seems to have placed it more definitely. The small flowers suggest *S. Nelsoniana* but the very pubescent calyx and reticulate carpels seem to remove it from that species. Good job for you to work out the relationship of these forms.
4782. Why not a small specimen of *Epilobium glandulosum* Lehm., var. *perplexans* (Trel.) Fernald?
4522. Haven't you, to use a seasonable metaphor, got your signals mixed on these mints? This seems to me *Mentha rotundifolia* (L.) Huds. while your no. 1869 sent out under that name, I should call *M. alopecuroides*.
4800. The correct name for this species appears to be *Magus japonicus* (Thunb.) Ktze., Thunberg's publication antedating Loureiro's.
- 4778 + 4816 Why not *Mimulus peduncularis* Dougl.? This species was listed from sands of the Columbia River by Gray in the Synoptical Flora, *M. floribundus* is ~~downey~~-hairy not merely viscid.
^{clammy}
4836. Better material might show this to be *Arctium nemorosum* Lejeune, but ~~may~~ be *A. minus* is safer, pending proof.

Nelson, James C. and Weatherby, Charles Alfred. 1922. "Plants from J. C. Nelson." *Plant lists : Mexico*
