

School of Mines. Columbia College,

CORNER 49TH STREET & 4TH AVENUE.

New York, Nov. 25, 1884

Dear Mr. Watson: -

Will you kindly compare enclosed with whatever Cyperus Californicus you have? It seems to agree pretty well with ^{your} description, excepting in the non-compound umbels, and narrower leaves of the specimen in this herbarium. I think ~~you~~ we can expand your description (Bot. Cal.) to include this form. Will you please give me your ideas on it?

Keep the scrap. Pringle sends it, collected in S. Arizona. -

Sincerely Yours
W. L. B.

The nut is oblong, and very sharply triangular

Britton, Nathaniel Lord. 1884. "Britton, Nathaniel L. Nov. 25, 1884 [to S. Watson]." *Asa Gray correspondence*
