

Harmonsburg, Pa.,

[May 14, 1898]

P. S.

They say a woman's letter is not complete - without a postscript - This one, however, is the work of two women. Mother wants me to ask if you care till the cause of the curling and distorted forms in fruit of a red maple - I fear this is not in your line of work - If so do not go to any inconvenience in the smaller -

By the way - this tree - seems

to differ somewhat in foliage from  
ordinary *G. rubrum* - Prof. Steyermark  
thinks it a distinct variety. I think  
the distorted wings are a new thing -  
at least I never noticed them before.

Handley
