

Perkins 60,
Cambridge, Mass.
5 Dec. 1908.

Dear Prof. Collins;

There will be quite a lot of duplicates among the mosses I gave you. If you care to use my labels let me know & I'll send you a package of the different kinds. I was reminded of this by Dr. Farlow, who asked for blank labels to use in sending out some duplicate fungi which I collected and turned over to him.

Except for one specimen of each number which I kept for myself you have all my ^{true} moss material. I'll send you a set of the 1908 Sphagna (nearly 100 numbers) when I hear from Warrington.

By the way, I have analyzed the Sphagnum ash from soil 24 (Alpine meadow, S. side E. fork R. S. A) and

should like to know what
species it was.

Yours very sincerely,

Harley Harris Barlett
