

Walden Oct 31. 1879

Dear Mr. Collins.

I have looked over
the algae, & return them herewith. They are all characteristic Southern New England species.

Only one is rare: *Arthrocladia villosa*: This has never been found on the N. E. coast outside of Vineyard Sound. If you can find out where these specimens came from, & if by any chance this should prove to be from R.I. or Conn., I shall be glad to know it so as to check one more column in the Club Check list.

I shall be glad to examine anything you send, at any

Time

Very truly

Frank S. Collins

Collins, Frank S. 1899. "Collins, Frank S. Oct. 31, 1899." *James Franklin Collins correspondence*
