

My dear Prof. Collins,

You asked me to send
you anything interesting in
the Polytrichaceae, and the
enclosed are the first two I
should like you to examine
when perfectly convenient.

Is #807 only a small *Poly-
trichum ohioense*? I do
not seem to have a good descrip-
tion of this species. The tip
cell of lamellae is slightly notched.
And can I call #806 a good
characteristic form of *Polytri-*

chem commune var. fungicola?

The lamellae in the middle of the leaf is 7-8 cells high, with end cell hardly broader than the rest and only slightly depressed.

Mr. Dunham joins me in sending you best wishes

Very sincerely yours
Olijah M. Dunham

53 Maple Street
Auburndale, Mass.

June 15-

Dunham, Elizabeth Marie. 1911. "Dunham, Elizabeth M. June 15, [1911]."
