

My dear Prof. Peters,

Mr. Chamberlain's card will  
be of interest to you if you have not  
already seen the article referred to.  
My specimen which you examined  
is No 770 in your herbarium. Has  
this form recently been made a var?  
I find both Dixon and Braithwaite  
speak of it as a "form of *P. gracile*"  
with fewer or longer lamellae than  
usual. Dr. Bill-Hans & the Vol I, pg  
296.

It seems to me more European.

friends are always making varieties.  
Mr. Dunham joins me in wishing  
you a happy and prosperous New  
Year.

Very sincerely yours  
Elizabeth M. Dunham

(Mrs. Grace L.)
