

(D)

My dear Mr. Collins,

Your last letter is fine in
the comparison of the species in
question, and I thank you ever so
much for all the time you have spent
for me. Your notes are well worth pub-
lishing and for me. In a letter
from Mrs. Bicknell received this morning
she wrote that my #807 was a most in-
teresting species and she hoped you
would decide what it is. I'm sure she
will be interested to learn the result of
your last examination. Mr. Winslow
who unks me comes with me once a
week, laughingly remarked that my

specimens would be wanted over so much
we would finally have to decide that it
wasn't a new species after all. But I'm
willing to risk it. While sending out
some material recently, I came upon the
enclosed plants which seem to me smaller
with more appressed leaves. This lot #808
was collected in the same spot but ten
days later than #807.

Thanking you again for your re-
examination, I am

Very sincerely yours
Elizabeth M. Dunham
