

Harvard University
HERBARIUM AND LABORATORIES
OF
CRYPTOGAMIC BOTANY

W. G. Farlow, 24 Quincy Street
R. Thaxter, 7 Scott Street

Do you agree to
my determination
of the *Dothecium*
myosurae!
Cambridge, Mass., U.S.A.

Nov. 11, 1903.

Dear Mr. Collins,

Of ferns I have those I
have collected myself which I keep as
a working U.S. collection to which
I add native species sent to me. I
have also a good set of exotic ferns
from all over the world given me many
years ago by Prof. Gray from the duplicates
when I arranged the ferns of the Gray
Herbarium. This collection is used to

illustrate betweens on the different
genera of ferns etc. Practically, I suppose
I have W. globella from Maine for I have
collected it at the Alpine Cascade,
Gorham, N.H., close to the boundary of
Maine. Therefore, as the species is
rare, I do not think that I should accept
your kind offer since specimens would
be more useful to botanists if in the
Gray Herbarium. I should be glad
to have you work here in the Christmas
recess if you have time although I shall
be away myself part of the time and I
hope that later when Prof. Bailey is
better you may be able to come at
intervals of leisure. Yours, truly
W.E. Felt

Farlow, W. G. 1903. "Farlow, William G. Nov. 11, 1903." *James Franklin Collins correspondence*
