

and it is hardly
worth the time to
cut out the speci-
mens and insert
them in my own
masses of *Desbarreauxia*.
If I have not already
shown you the set
I should like to do
so the next time
you come to Cambridge.

Yours, very truly
W. G. Farrow,

Cambridge

Jan. 22,
1907.

Dear Mr. Collins,

The package of
Limnobia in arctica
reached me safely
and I am much
obliged to you. No
hurry whatever
about the Alaska
Masses. I am very
glad that you did
not send them
now for I am head
over heels trying
to clean up this week.

Do you remember
my showing you
a set of mosses
bought about a
year ago? It was
a collection by
H. Mueller of 13
fascicles and was
ordered by mistake.
I supposed when
ordering it that it
was a regular published
series of *Musci exsiccati*
but it turned out
that the set I had
in mind was by
another Mueller and
what I bought was

really only the private
mass *Recharum* of
H. Mueller. I do not
know exactly who
he was.

The set is done
up in Manila board
covers and specimens
arranged systematically.
A good many of the
specimens are from
published *exsiccati*
some of which I
recognize and some
not. I hardly know
what to do with the
set. It is not one
to be kept in
separate *exsiccati*

Farlow, W. G. 1907. "Farlow, William G. Jan. 22, 1907." *James Franklin Collins correspondence*
