

Readville, Mass.

5 June 1907

Dear Collins:

Your letter here, and you
are in the same fix as I
about the name, var.
attenuatum. Farlow
gave it me with comment
gracile var attenuatum.
I send you a sample
which you can keep, &
I shall be glad to have
your opinion on it.
It is from Mansfield 3 July '97

Your other letter with the
Gaspé specimens also here
& I thank you for the very
interesting ones you have
sent me: they suggest
the cold tops of wet
mountains, where in fact
I wish I could be to help
you gather them in.

I am glad to have your
drawing of the lamellae
of the Great Gulf moss
Pogonatum capillare:
particularly as it agrees
so well with a note I
had made from a
White Mt spec given
me by Farlow. I have
put that sheet of three
large envelopes now
into the capillare cover.

I had to leave the Hall
Friday evening my head
got so shaky I could
not remain and I
came home on the
electric car at 10.

Mrs K. joins me in
best wishes for the
Summit.

Sincerely yrs

Geo S Kennedy

Kennedy, George G. 1906. "Kennedy, George G. June 5, 1906." *James Franklin Collins correspondence*
