

I hope I shall be able
to get into the Club
meetings, for I missed
them and you last
winter.

Mrs. Kennedy wishes
to be remembered to
you. She has been
unusually well this
summer. Mildred
is at the Thousand
Islands. St. Lawrence River
with some Philadelphia
friends and Sinclair
is in Newfoundland
exploring a river they
noted last summer.
He expects to be away
till after Oct 1st.
I should be glad to run
down & see you when you
have a convenient day.
Truly & G Kennedy.

Readville, Mass.

15 Sept 1907.

My dear Collins,
your kind letter
gave me much pleasure.
I am glad to welcome
you back from the
land of storms &
hard weather. I
suppose the wet season
may have helped
the mosses & that
you brought back
more fruiting ones
than usual.

I have been better
in health than last
winter tho' with
occasional shaky

reminders that my
head is not quite
what it used to be.
Mrs Kennedy & I have
been three times to
Wallingford Vermont
10 miles so. of Rutland
on the Rutland & Albany
R.R.: everything there
is New York — they
have never heard
of Boston —

Being on the West
Side of the Green Mts
the limestone areas
are frequent: the
other creek flows thro
the valley & the marble
is wholly on the West
side of the creek, while

on the East side it is
wanting. The East
side hills are shaly
or granitic & the
springs reminded
us of Willoughby.
Two rarer mosses
were plenty,
Orthotrichum orinomatum
& *Barbula* (? *convoluta*)
But I did not do much
with the mosses.
One pretty plant was
Cardamine pratensis
the Ladies Smock of
Shakespeare, making
the meadow white
with its beauty.
I have brought back
quite a bundle to
look over this winter.

Kennedy, George G. 1906. "Kennedy, George G. Sept. 15, 1906." *James Franklin Collins correspondence*
