DRUG PLANT INVESTIGATIONS.
POISONOUS PLANT INVESTIGATIONS.
TEA CULTURE INVESTIGATIONS.

Washington, D. C., December 11, 1905.

Prof. J. Franklin Collins,
Brown University,
Providence, R. I.

Dear Prof. Collins:

I have your card of December 8, requesting culture of nitrogen-fixing bacteria, and I have placed your request with the Office of Plant Physiology and Pathology. I am sure that the culture material will be ready for you when you desire it. It would be well to indicate the kinds of plants which you wish to inoculate since there is a special organism for each group of legumes.

I will send a copy of the moss paper with my best compliments.

Yours sincerely,

Physiologist in Charge.

True, Rodney H. 1905. "True, Rodney H. Dec. 11, 1905." *James Franklin Collins correspondence*
