

325 Park St.

West Roxbury, Mass.

Dear Mr. Collins,

Thanks for the pamphlets received today. As yet I have not had time to look them over but will probably get time to do so this evening.

You remember at the last meeting I spoke to you about a specimen of tree you once showed at a meeting of the Club that had a peculiar defect and I referred you to a recent publication of the Dept. of Agr. for a possible solution. The publication I referred to

is Bull. No. 39 Biological Survey. Woodpeckers in Relation to Trees and Wood Products by L. L. McAttee.

See Figs. 30, 33, 34, 35 of this report - also paragraphs on pages 62, 63, 65, 66, 72, 74, 78. ~~10~~ It may be

that your specimen was not caused by sapeworms at all. The cuts referred to above certainly remind me of the specimen you showed and you may be interested to follow the matter up further in the light of what this report discloses.

Sincerely,

F. S. Floyd.

Floyd, Frederick Gillan. 1885. "Floyd, Frederick G. undated [4th item]." *James Franklin Collins correspondence*
