

Cambridge, 20th Sept. 1854

My Dear Wright.

The last time but one that I wrote to you, as far as I know, was in Feb. last, - when I sent a goodly letter for you to Prof. Baird to be forwarded; and about the same time I sent thro' the Smithsonian a parcel containing some botanical pamphlets, - among them Torrey's 3 memoirs - which he might forget to send.

Then, late in July, I wrote you a letter, via England & Ireland mail to Hong Kong (paid thro' me) which I trust has reached you safely. Since then I have not heard from you, but have seen a later letter at Torrey's, and have heard indirectly of you from your brother. In my last, I was mistaken in saying that young Storer had got home. He has now arrived, however, and I hear his health is very delicate.

In my last I told you I had got the books you wanted, as far as possible - and I sent a regular bill, so that you could get the money from the Navy, as a requisition. The books, well packed, were put into the Smithsonian hand early in August; and Prof. Henry duly wrote me that they had been given into the proper hand at the Navy Department to be forwarded to you. So I hope they will come all right. The delay, as I explained, was owing to my waiting from June to August for Putnam to get a few copies of text of Botany of Exploring Expedition

bound. Now let me see for news since
then. The least pleasant first. I told you I
suppose that I had sold the greater part of the
copies of my Nat. Expl. Exped. (vol. 1. with refusal
of the rest) to Putnam & Co - for just about enough
to pay what they cost me. I took Putnam's
notes for 4 to 6 months, for \$400 in payments.

Well, now, just as the first of these is coming
due. Putnam & Co - in a piece of hard times,
up and stop payment. - leaving me to pay
printer & paper - in any way I can. - so I
shall be very much straightened this winter
when every thing is dear (coal at \$9.00), when I expect
to be rather comfortable. Putnam is trying to arrange
with his creditors to go on. - but I fear I shall
get nothing this winter or fall, and perhaps little
next winter. If he makes fairly, I shall lose some
5 or 10 dollars or more by him. - which is hard.

Atlas to Nat. Expl. Exped. vol. 1. not yet ready. I suppose
not having yet finished the drawings - so slow is his

At the 1st of this month, I made a little visit
to Torrey at New York. - he only at home; family
all up in the country, and Mrs Torrey in very poor
state of health. I fear she will not get up strong
again.

I looked over Bigelow's collection
made in Whipple's Survey - all the best plants
Californian & especially on eastern border of California.

Some new stray curious things. I am now
printing a little memoir on Thurber's new plants
set while under Bailett, in Trans. Acad. Sci. Philad.

On Monday I got a proof back from him - from
Providence - and the next day I learn from the
newspaper - that, while printing, "Mr. George Thurber"
(I fear our friend) had one head blown to pieces
by the accidental discharge of a gun. I do hope
he will not lose the member!

We have got from Mexico a new strip of land in
Sonora - and Emory is appointed the Commissioner to
run the new boundary. He takes not bitanist (which is mean)
but Schott is to collect all he can.

I told you Parry is married. He & his wife were
 lately at N.Y. Torrey saw them, and says she is a
very nice body.

William's Journal is sent you regularly from
New Haven, to care of Com. Knapp. I hope
you get it.

I am distributing, as I get spare hours,
in the barn - the great mass of Berkeley's collection
of plants (bought by Hunt) off into sets. They are
mostly the regular Truman things - gathered 20 years
ago. It is a great job.

I am working hard to get copy of rest of vol. 2
of Flora N. America ready for printer - I hope to
begin to print it at the beginning of winter. - I am
getting on with Pl. Wright. Pt. 3. at the same
time; making it a sort of commentary off the Flora, &
but it is very slow & troublesome work.

I am alone, my wife at Beverly, helping to nurse
a sick niece Kitty Loving (whose father is in Europe)
— who has been sick nigh unto death; but now
seems likely to get well.

When you get into the Pacific, & onto the
field where good work is to be done, I hardly
doubt but that you will be put back to the steam
— when you will do better, and will enjoy yourself
very much more. I dare say your patience is
~~now~~ sorely tried now; but don't give up, — and hereafter
you will have better times. At China, if near him
(Canton, or Macao) you will know S. Wells Williams,
Ed. of Chinese Repository — a fine man & once
a very fair botanist. He will remember me well.

I hope you will have a chance to ransack
the Sandwich Islands where is yet much to be done, in the
mountains.

The last package sent to you contained,
Lindley India Orchidacea pts. 1-4.
Walp. Repert. & Annals Syst. Bot. 9 vols. bound.
Hooker (Bauer) Genera of Ferns —
Muller's Species Muscorum. 2 vols. —
Botany of Expl. Exped. in Seas — vol. 1 (text) &c.

Maclean's ed. on the ~~Flora~~ Ferns is all printed (under
400 pages) but not yet out. The atlas of plates is to be out at the same
time, or nearly.

With best wishes for a good time
and a safe return, I remain, Dear Friend
Ever yours
Asa Gray
