

Austin July 8th /48

My Dear Sir

I start on monday next for the Rio Grande at the solicitation of Dr Beatch who commands a company at one of the military stations on that river What the opportunities for preserving plants will be I can not tell until I arrive there He offers me a clerkship in his company during the remainder of the term of service which expires on the 23d of Oct. and he adds that I will have plenty of time to make botanical excursions - but I fear I shall have to start without my glass which I have been so long impatiently waiting for

I have received all your letters written the present year - the last under date 17th May

We have had no late mail the steamers being (I suppose) employed in the transportation of troops I shall have one more opportunity to get letters by the mail of tomorrow night after which I shall have to wait a long time

I have heard nothing from Howle for some time He has not sent me the receipt for the bill you paid him nor has he answered my letters for more books for which I wrote There may not have been time for his letters to reach me I sent him a bill for about \$25-30 worth of books shortly after you wrote me that you had told him to let me have more books on your acct Please enquire of him about the matter

I send you the upper & caudate leaves of a very common species of Chrysopsis The lower are similar to the caudate with perhaps a petiole some-

what longer I have not examined it very closely,  
but among the several descriptions of Species I  
did not notice any mention made of the peculiar  
aromatic petioles. The papus is rather tawny.

I send also the seed of a species (rare) of *Besicaria*  
which I have found only in one locality near this  
<sup>on the mountain</sup> place. It is biennial many nearly erect stems from  
the same root leaves oblongate <sup>and nearly linear</sup> scattered towards  
the summit raceme rather short <sup>5 to 6 inches long</sup> pedicels  
slight globose-ovate, a little shorter than the style and  
3 times the length of the stipe. I send you the seed that  
you may have an opportunity of planting them this  
summer or in the fall.

I intended to visit some of the military stations above  
here on this river but have not been able to accomplish  
my object.

I am Dear Sir

Yours respectfully

Charles Wright
