Month Laston, Mass. aug. 22, 1921

My auan She Standley ,

This in-first a time to bit you know that I have been pushing aleas with the orching flora of Central Camerica. The Preliminary work of edentifying unmanian specimens, drawing the analyses and checking up Previous work, and planmacing about an Schelder mage of new species and grups indicates that you have passes to me a task of overwhelming arfliently, al came a compilation wonler the a simple undertaling, het ya do me wat these an I wind alterfo it relateratly, A as for Schlich nevelle ? he sure l bui gestrounies able apress Plant and be nice pution as anderty as he promise he anges I never my thereas m the come of severel months. I an aiffieldy nel Centre Comerine archit i the hayines That surrance Reichenbulis apecus, as you weekun, he die handen mul miting for Entire Ormanics on rean formy Comparty en ding the filthe for t Municipa and your man to serve a callet and I hope that is can see you to equation to an Conto Rice top a work is long. How about Hang Juliula, 14 mal some time og U h har much calleding for and the the multiwer can thing the matine mun! This was last writer . The Day Hubann, of the way, will be a great help. The are many things they that a missing to the make white an of my very free called Do ya know while a mit the mosion Dalan & a stray we centre Comman spicen? I am very much supring at the upalines of the Mational likebanin in que Ching for Habenan and che maller group of achier. Underlied the alle not for the mile Hele you we will be a son A perfa.
