

355 Commonwealth Avenue, Boston, Mass.

April 15th, 1922.

My dear Mr. Powell:

Your letter enclosing no. 230 has just arrived. Although from a single flower and no vegetative parts it would be unwise to attempt a determination for you pending a report from Dr. Schlechter, you may be interested to know that your specimen is close to Sigmatostalix costaricensis Rolfe.

I have already reported on the Sphagnum from Chiriqui. I have already sent plaster. Genus covers will be forwarded to-morrow. The printer who had the labels in hand lost his establishment in a fire.

I will send you some labels just as soon as I can get them printed.

A thousand thanks for the stamps/ These, of course, are of great interest to my daughter and she has asked me to thank you on her account.

1/
The label I planned for you was copied from the type-written one you use now.

Vol VII of Orchidaceae will reach you before this letter does.

Yours faithfully,

Oakes Ames.

Ames, Oakes. 1922. "Ames, Oakes April 15, 1922 [to C.W. Powell]." *Oakes Ames Orchid Herbarium correspondence files*
