

April 3, 1913.

My dear Dr. Schlechter:

Under separate cover I am sending to you to-day one hundred Philippine orchids. I am sorry that the same species occurs more than once in several cases, but I have sent complete representations of Vanoverbergh's and Webers collections so far as these are ready for distribution. You will remember that I promised complete sets without regard to duplication or to the more common species. I am also sorry that I am unable to send to you a larger number of specimens at this time, but I have been so busy with outside work that I have been obliged to give up every effort to finish my studies on the different collections from which you are eventually to receive duplicates. I am already at work on another package for you which I will send on just as soon as it is big enough to be worth your attention. Undoubtedly there will be additions to your herbarium in some of the later packages if the present one is disappointing. At least the quality of the specimens is above the average.

From Wenzel who is collecting in Leyte I am receiving some interesting material and as Vanoverbergh has removed to another province in Luzon we may expect something new from him. I think Vanoverbergh is a good collector, and when he has had more experience I feel sure that he will give us very satisfactory results.

Please send me some of your material as soon as convenient. In the meantime I will do my best to supply you with another package equal to the one now on its way to you.

I intend to get out my Chinese material in a short time and I will send to you as complete a set as possible under the ~~XXX~~ terms expressed in you last letter just received.

Mrs. Ames has promised to make a drawing for you from the type of *Pogonia affinis* and I will send it along just as soon as she has finished it. I have had the borrowed specimen here for nearly a year , but always something has turned up to cause delay.

The last package of specimens you sent was most welcome.

Yours sincerely,

1st sending to Schlechter.
100 numbers.

Sent to Berlin April 3, 1913
