

355 Commonwealth Avenue, Boston, Mass.

January 31st, 1921.

My dear Dr. Schlechter:

I do not find reprints of your articles in *Orchis* for June 1914 p. 57, July 1914 *Pleione*; Feb. 1913 *Calanthe*, March 1913 *The Genus Xylobium*. I would like to have these for my herbarium. My set of *Orchis* stops with the fifth number of 1914 (July).

I enclose a rough drawing and two flowers of an *Epidendrum* from Venezuela.

I have been very busy getting my periodicals and pamphlets ready for binding. Since the war began I have done nothing toward completing my files and I find many gaps in my foreign subscriptions. The price of binding has been prohibitive and even now one hesitates before ordering anything done in leather.

If you have duplicates of *Acriopsis* I would like to have them. This genus has interested me very much recently and I think it is one that I would like to do for the Monograph. If you have no objections, of course!

My "new genus" turns out to be an *Aganisia*. I have a *Pleurathallis* from British Guiana, however, that seems to be undescribed. I also have two species of this puzzling group from Trinidad that I cannot trace. One is very much like *P. rhomboglossa* and the other belongs to the same alliance as *P. fimbriata* Rodr. and *P. Josephinum*^P. The Wright specimens of *P. rhomboglossa* from Cuba are larger than the Trinidad species.

Yours sincerely,

Robert L. Wms.

Ames, Oakes. 1921. "Ames, Oakes Jan. 31, 1921 [to R. Schlechter]." *Oakes Ames Orchid Herbarium correspondence files*
