

ans 26

Springside,
Middlebury, Vermont. April 21, 1904.

Dear Dr. Kennedy:-

In a recent letter from Eggleston, the only part of which not destroyed I enclose, he reported three "finds" of yours that I was to add to his list of addenda to the Vermont Flora, which I have undertaken to revise. I supposed you had recently sent these names in to him; and am glad to get your direct judgment on them.

No. (1) I know but little about; it is not in the recent Britton Manual. Where was it published? Is it more than a trivial state of the species?

No. (2) must be rather var. intermedium D.C. Eaton; Vermont is quite out of the range of var australe, Eaton.

No. (3) is rightly considered only a "small phase of the species: "---B. Virginianum, Sw.

I have had a dreadful trying to get Eggleston's MS into decent shape. The revision is now finished excepting the Pteridophyta. and I hope to get a prompt answer from you regarding these three fern-allies.

Yours sincerely,

Ezra B. S.

Brainerd, Ezra. 1904. "Brainerd, Ezra 21 Apr 1904." *George Golding Kennedy correspondence*
